

# DISCOUNT DRUG PROGRAM

## Quick Reference Guide

## Get the most from your Prescription Discount Drug Program

The Blue Cross and Blue Shield Service Benefit Plan provides a Discount Drug Program for our members. This is for drugs your pharmacy benefit does not cover. It's a way to get lower prices on prescription drugs at most pharmacies.

- Save an average of **24%** off some prescription drugs.
- Save the most on generic drugs.
- Use your Service Benefit Plan ID card at most pharmacies.

### Your savings

What you'll pay for these drugs will be the lower of these two price points:

**The discount price through this program**

or

**The pharmacy's regular retail price**

### Tips to save money

Ask your doctor about generic drugs. You can save anywhere from **30-80%** by using generics. And they work the same as brand name drugs.\*

Show your member ID card at pharmacies that take part in the Discount Drug Program.

## Protecting your health

- Keep an up-to-date list of your drugs, drug allergies and emergency contact numbers in your purse or wallet.
- Review the drugs you are taking with your doctor or pharmacist on a regular basis. Be sure to include herbal and vitamin supplements.
- Read and follow the safety instructions included with your drugs.
- Take prescription drugs that are prescribed only for you.
- Do not take expired drugs.
