## *H. pylori* Infection Agents

### Description

Lansoprazole, amoxicillin, clarithromycin

Omeclamox-Pak (omeprazole, clarithromycin, amoxicillin)

Pylera (bismuth subcitrate, metronidazole, tetracycline)

Talicia (omeprazole, amoxicillin, rifabutin)

Voquezna Dual Pak (vonoprazan, amoxicillin)

Voquezna Triple Pak (vonoprazan, amoxicillin, clarithromycin)

---

### Background

*Helicobacter pylori* (*H. pylori*) is a gram-negative microaerophilic bacterium recognized as a major cause of peptic ulcer disease and gastritis. Infected people have an increased risk of developing gastric cancer and mucosal associated-lymphoid-type (MALT) lymphoma compared with their uninfected counterparts. Asymptomatic infections do not need to be treated. Patients with active duodenal or gastric ulcers should be treated if they are infected. *H. pylori* is typically treated with a combination of antibiotics plus a proton pump inhibitor (PPI), and treatment should be determined on an individual basis (1).

### Regulatory Status

FDA-approved indications:

- **Lansoprazole/amoxicillin/clarithromycin** triple therapy is indicated for treating *H. pylori* and duodenal ulcer disease (active or one-year history of a duodenal ulcer) to eradicate *H. pylori* (2).

---

<b>Section:</b>	Prescription Drugs	<b>Effective Date:</b>	July 1, 2023
<b>Subsection:</b>	Gastrointestinal Agents	<b>Original Policy Date:</b>	September 8, 2011
<b>Subject:</b>	<i>H. pylori</i> Infection Agents	<b>Page:</b>	2 of 6

---

- **Omeclamox-Pak**, a co-packaged product containing omeprazole, a proton pump inhibitor, clarithromycin, a macrolide antimicrobial, and amoxicillin, a penicillin class antibacterial, is indicated for the treatment of patients with *H. pylori* infection and duodenal ulcer disease (active or up to one-year history) to eradicate *H. pylori* (3).
- **Pylera** is a combination of metronidazole, a nitroimidazole antimicrobial, tetracycline, a tetracycline class antimicrobial and bismuth subcitrate potassium, indicated for use, in combination with omeprazole, for the treatment of patients with *H. pylori* infection and duodenal ulcer disease (active or history of within the past 5 years) to eradicate *H. pylori* (4).
- **Talicia** is a three-drug combination of omeprazole, a proton pump inhibitor, amoxicillin, a penicillin-class antibacterial, and rifabutin, a rifamycin antibacterial, indicated for the treatment of *H. pylori* infection in adults (5).
- **Voquezna Dual Pak** is a co-packaged product containing vonoprazan, a PCAB, and amoxicillin, a penicillin class antibacterial, indicated for the treatment of *H. pylori* infection in adults (6).
- **Voquezna Triple Pak** is a co-packaged product containing vonoprazan, a potassium competitive acid blocker (PCAB), amoxicillin, a penicillin class antibacterial, and clarithromycin, a macrolide antimicrobial, indicated for the treatment of *H. pylori* infection in adults (6).

The safety and effectiveness of the *H. pylori* infection agents included in this policy have not been established in pediatric patients (2-6).

#### Related policies

##### Policy

*This policy statement applies to clinical review performed for pre-service (Prior Approval, Precertification, Advanced Benefit Determination, etc.) and/or post-service claims.*

**Lansoprazole/amoxicillin/clarithromycin, Omeclamox-Pak, Pylera, Talicia, Voquezna Dual Pak, and Voquezna Triple Pak** may be considered **medically necessary** if the conditions indicated below are met.

**Lansoprazole/amoxicillin/clarithromycin, Omeclamox-Pak, Pylera, Talicia, Voquezna Dual Pak, and Voquezna Triple Pak** may be considered **investigational** for all other indications.

**Section:** Prescription Drugs  
**Subsection:** Gastrointestinal Agents  
**Subject:** *H. pylori* Infection Agents

**Effective Date:** July 1, 2023  
**Original Policy Date:** September 8, 2011  
**Page:** 3 of 6

## Prior-Approval Requirements

**Age** 18 years of age or older

### Diagnoses

Patient must the following:

*H. pylori* infection

**AND ALL** of the following:

- a. Diagnosis has been confirmed by endoscopy, breath testing, or stool testing
- b. Lansoprazole/amoxicillin/clarithromycin, Omeclamox-Pak, and Voquezna Triple Pak **only**: **NOT** clarithromycin-resistant
- c. Pylera **only**: will be co-administered with omeprazole
- d. **ALL** of the following for Talicia **only**:
  - i. Suspected to be clarithromycin-resistant
  - ii. **NO** concurrent use with certain HIV medications, such as rilpivirine and delavirdine
- e. **NO** previous use of the requested therapy regimen in the last 365 days

## Prior – Approval *Renewal* Requirements

Same as above

### Policy Guidelines

#### Pre - PA Allowance

#### Quantity

Drug	Quantity per <u>365</u> days
Lansoprazole/amoxicillin/clarithromycin	112 capsules <b>OR</b>
Omeclamox-Pak	80 capsules <b>OR</b>
Pylera	120 capsules <b>OR</b>
Talicia	168 capsules <b>OR</b>
Voquezna Dual Pak	112 units (84 capsules and 28 tablets) <b>OR</b>

---

<b>Subsection:</b>	Gastrointestinal Agents	<b>Original Policy Date:</b>	September 8, 2011
<b>Subject:</b>	<i>H. pylori</i> Infection Agents	<b>Page:</b>	4 of 6

---

Voquezna Triple Pak	112 units (56 capsules and 56 tablets)
---------------------	--

Regimens needing more than the quantities listed above are not covered.

**Duration** 12 months

## Prior – Approval Limits

### Quantity

Drug	Quantity for <u>14</u> days
Lansoprazole/amoxicillin/clarithromycin	112 capsules <b>OR</b>
Omeclamox-Pak	80 capsules <b>OR</b>
Pylera	120 capsules <b>OR</b>
Talicia	168 capsules <b>OR</b>
Voquezna Dual Pak	112 units (84 capsules and 28 tablets) <b>OR</b>
Voquezna Triple Pak	112 units (56 capsules and 56 tablets)

Regimens needing more than the quantities listed above are not covered.

Must be a different therapy regimen than Pre-PA.

**Duration** 2 weeks

---

## Prior – Approval *Renewal* Limits

Same as above

## Rationale

### Summary

Lansoprazole/amoxicillin/clarithromycin, Omeclamox-Pak, and Pylera are indicated for the treatment of patients with *H. pylori* infection and duodenal ulcer disease (active or one-year history) to eradicate *H. pylori*. Talicia, Voquezna Dual Pak, and Voquezna Triple Pak are indicated for the treatment of *H. pylori*. The safety and effectiveness of the *H. pylori* infection agents included in this policy have not been established in pediatric patients (2-6).

### Policy History

Date	Action
January 2013	Addition of Omeclamox Annual editorial review
June 2014	Annual review and addition of Pylera
September 2015	Annual editorial review and reference update
March 2016	Annual editorial review, Subsection changed from anti-infective agents to gastrointestinal agents, Policy code changed from 5.03.21 to 5.50.21,
September 2016	Annual editorial review and reference update.
March 2017	Annual editorial review and reference update
March 2018	Annual editorial review and reference update
July 2018	Update in Pre-PA, Prior Approval, and Prior Approval <i>Renewal</i> Limits Addition of no previous use of the requested therapy regimen in the last 365 days to criteria
September 2018	Annual review
March 2019	Annual review
November 2019	Addition of Talicia and renamed policy Prevpac Pylera Omeclamox Talicia

<b>Section:</b>	Prescription Drugs	<b>Effective Date:</b>	July 1, 2023
<b>Subsection:</b>	Gastrointestinal Agents	<b>Original Policy Date:</b>	September 8, 2011
<b>Subject:</b>	<i>H. pylori</i> Infection Agents	<b>Page:</b>	6 of 6

---

March 2020	Annual review. Added Talicia requirements that infection is suspected to be clarithromycin-resistant and no concurrent use with certain HIV medications, such as rilpivirine and delavirdine per SME
June 2020	Annual review
September 2021	Annual review
June 2022	Addition of Voquezna. Removed Prevpac brand name due to being discontinued. Renamed policy <i>H. pylori</i> Infection Agents.
September 2022	Annual review. Per SME, removed duodenal ulcer disease from criteria and collapsed criteria requirements into one section. Per SME, added requirement that <i>H. pylori</i> infection diagnosis confirmed by endoscopy, breath testing, or stool testing
June 2023	Annual review
